

- Dekho bhai mene bola tha ki ye line jo blue color ki dikhai hein wo show honi hi nahi chahiye. Tumne kya banaya Scenes jaha likha hein uske left side mein ek extra button add kar diya. So jab bhi uss button ko click karte hein to pehle ye blue line show hoti hein fir iss blue line mein jo arrow left side mein dikh raha hein usko click karte hein to fir wo Scenes ka new panel shoe hota hein jo mene pink color mein dikhaya hein wo. Actually kya hona chahiye ki jab tumne Scenes likha hua hein uske left side mein jo button banaya hein usko click karne se directly hi ye Scene ka new panel khulna chahiye jo pink coclor ka mene dikhaya wo penel. ye blue coclor mein dikhai hui panel ko tum dele hi kardo bhai wo shoe kabhi bhi nahi honi chahiye.

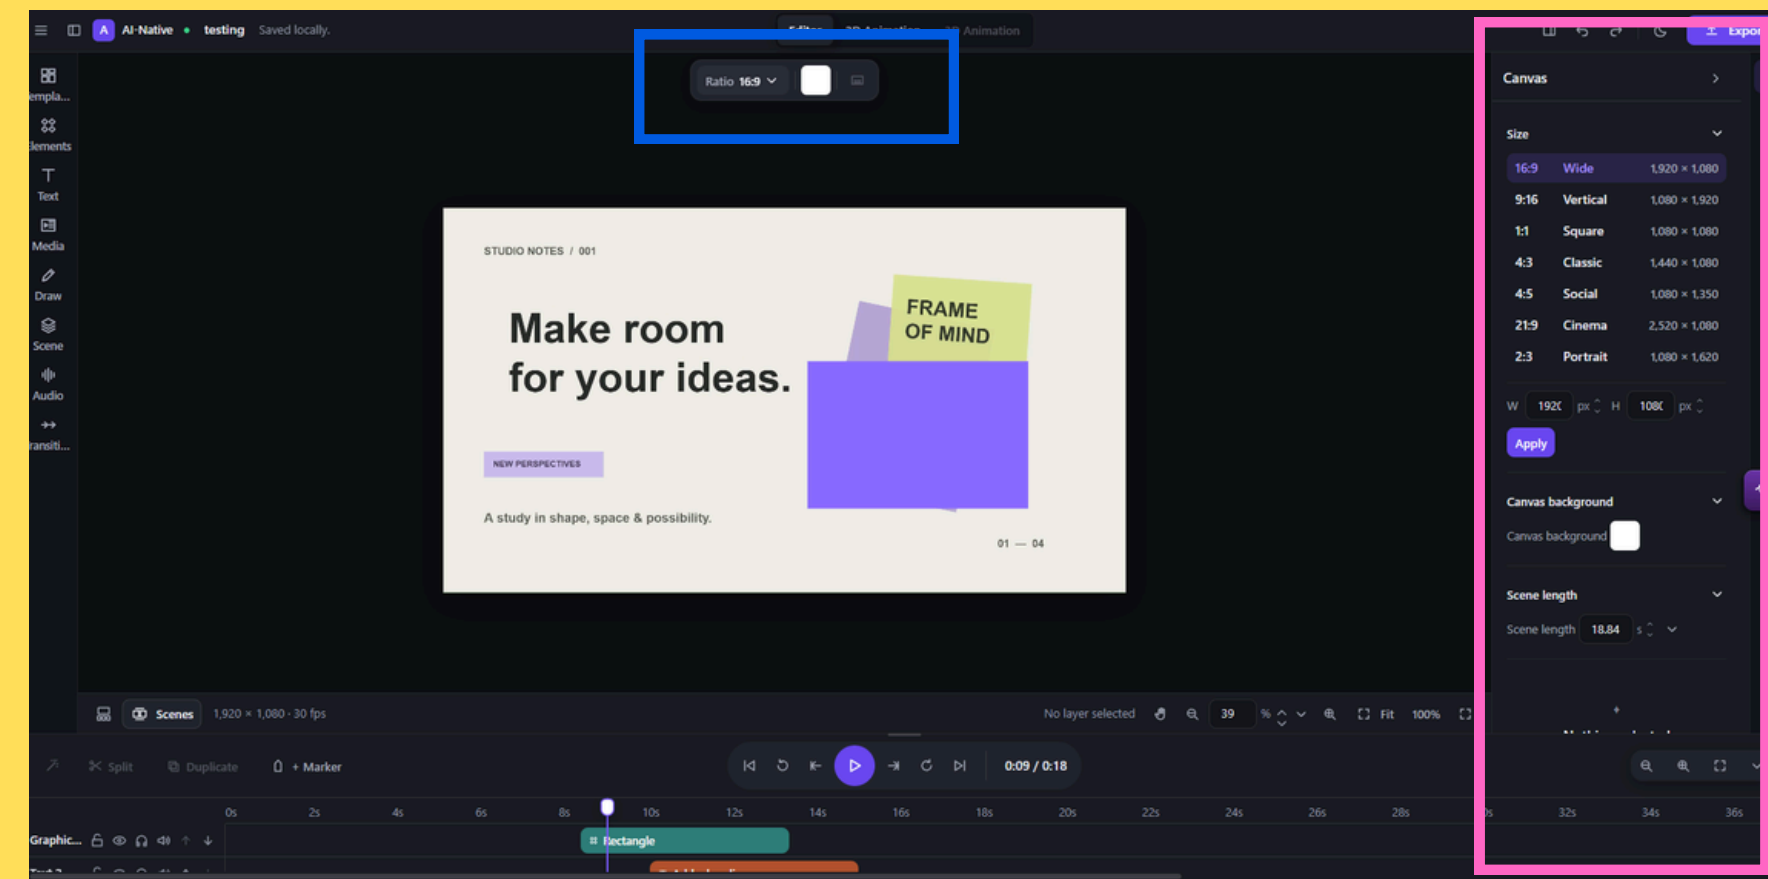

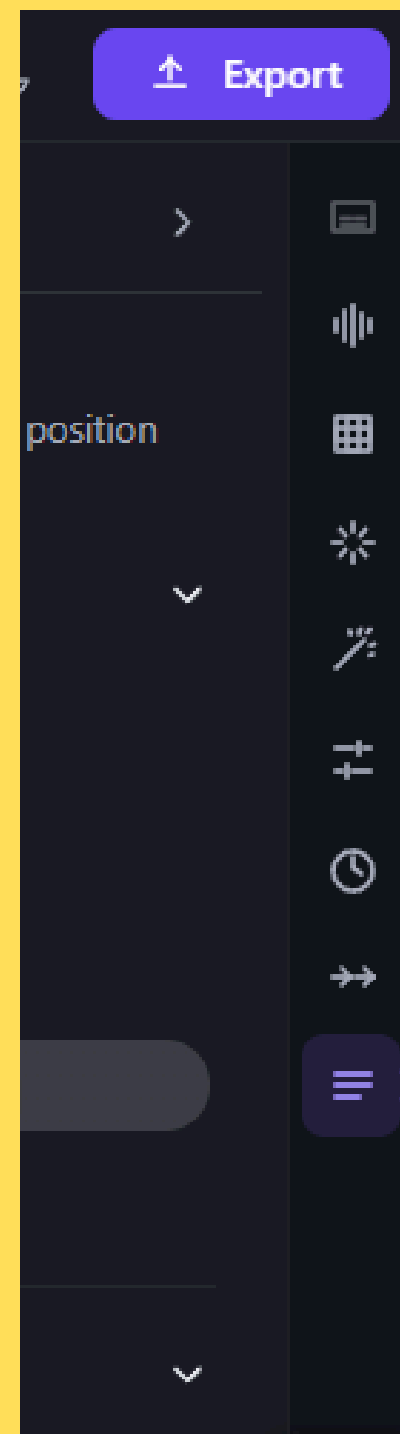

- Fir bhai ye dekho iamge mein mene dikhaya hein ki canvas mein kisi object ke right click menu open hota hein aur same uss time timeline mein kisi object pe right clik karte hein tab uska menu dikh raha hein but wo canvas ka menu bandh nahi hua wo shoe hi kar raha hein, actually right click menu open hone ke baad ham kahi bhi kisi bhi jagah click kare to wo menu close ho jana chahiye. Fir ek Bug aur ki canvas aur timeline ka right click menu mouse se scroll nahi ho raha hein usse solve karo. Fir timeline mein kisi bhi object ke right click menu mein jo speed, audio etc se ek sub menu khulta hein wo uss par mouse se click karne par hi open ho raha hein hover karne se nahi ho raha. So hover se submenu opne hona chahiye.

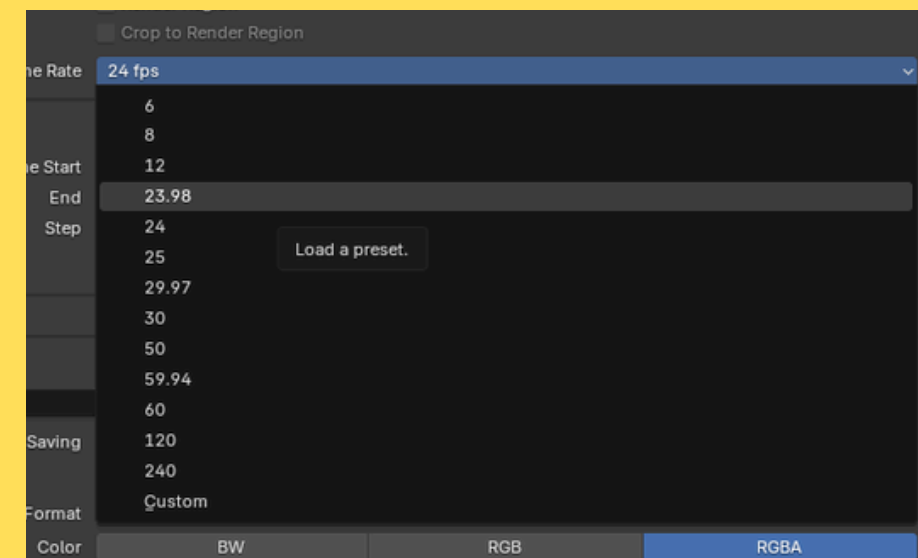

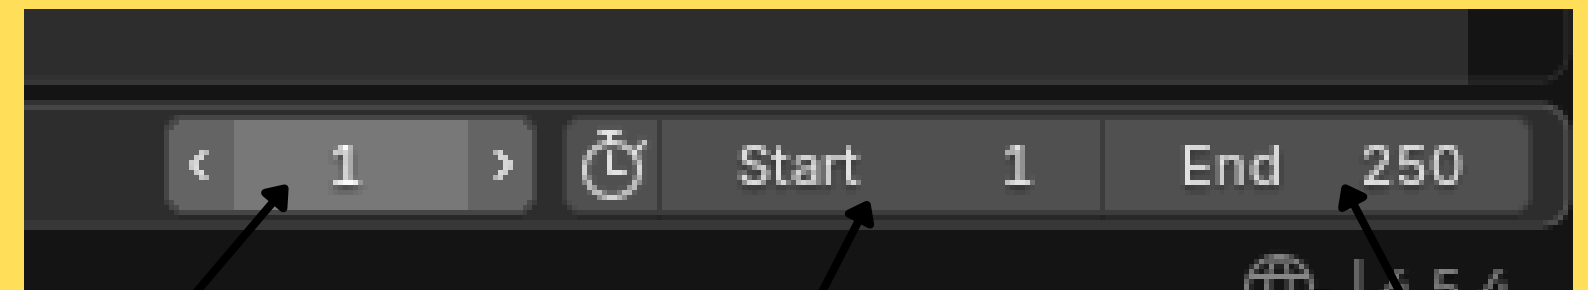

- Fir bhai jo tumne right side ka panel banaya hein wo sirf icons hi hein uske neeche koi text nahi add kiya jisse user ko pata chale ki ye konsa feature hein, jese tumne left side ke panel mein dekho kesa banaya hein Icons aur texts dono so user ko pata chale ki ye konsa feature hein. So ye right side panel mein har ek assets ke according uske icons jo bohot hi chote dikh rahe hein uski size increse karo aur uske neeche texts bhi add karo. jesa left side panel mein banaya hein wesa.

- Fir bhai ye jo Canvas ka right side panel (pink color ka) ko to tum delet hi kar do. Uska koi kaam hi nahi hein. Lekin han sirf canvas ka hi. baki kisi bhi assets ka nahi. Aur fir jo canvas ka floating panel hein usmein add feature FPS ka bhi add karo. waha FPS ka feature jo mene image mein dikhaya hein wesa click karne par FPS ka menu khulta hein aur FPS change kar sakte hein.

- Fir bhai ye dekho Frame rate change ka feature jo blender mein already hein. Usko dekho ek bar kесе kaam karta hein.

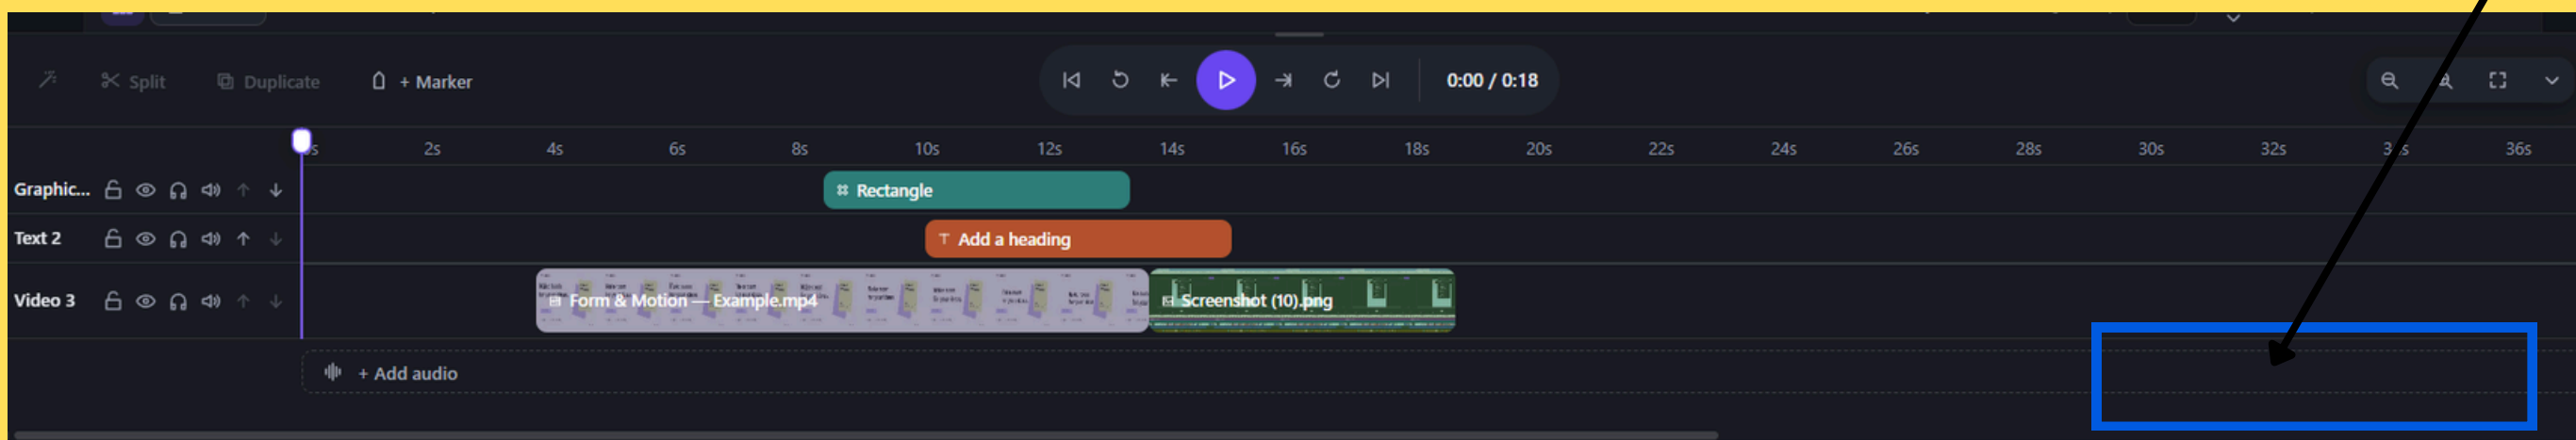

Current Frame

First frame of
playback/rendering
range

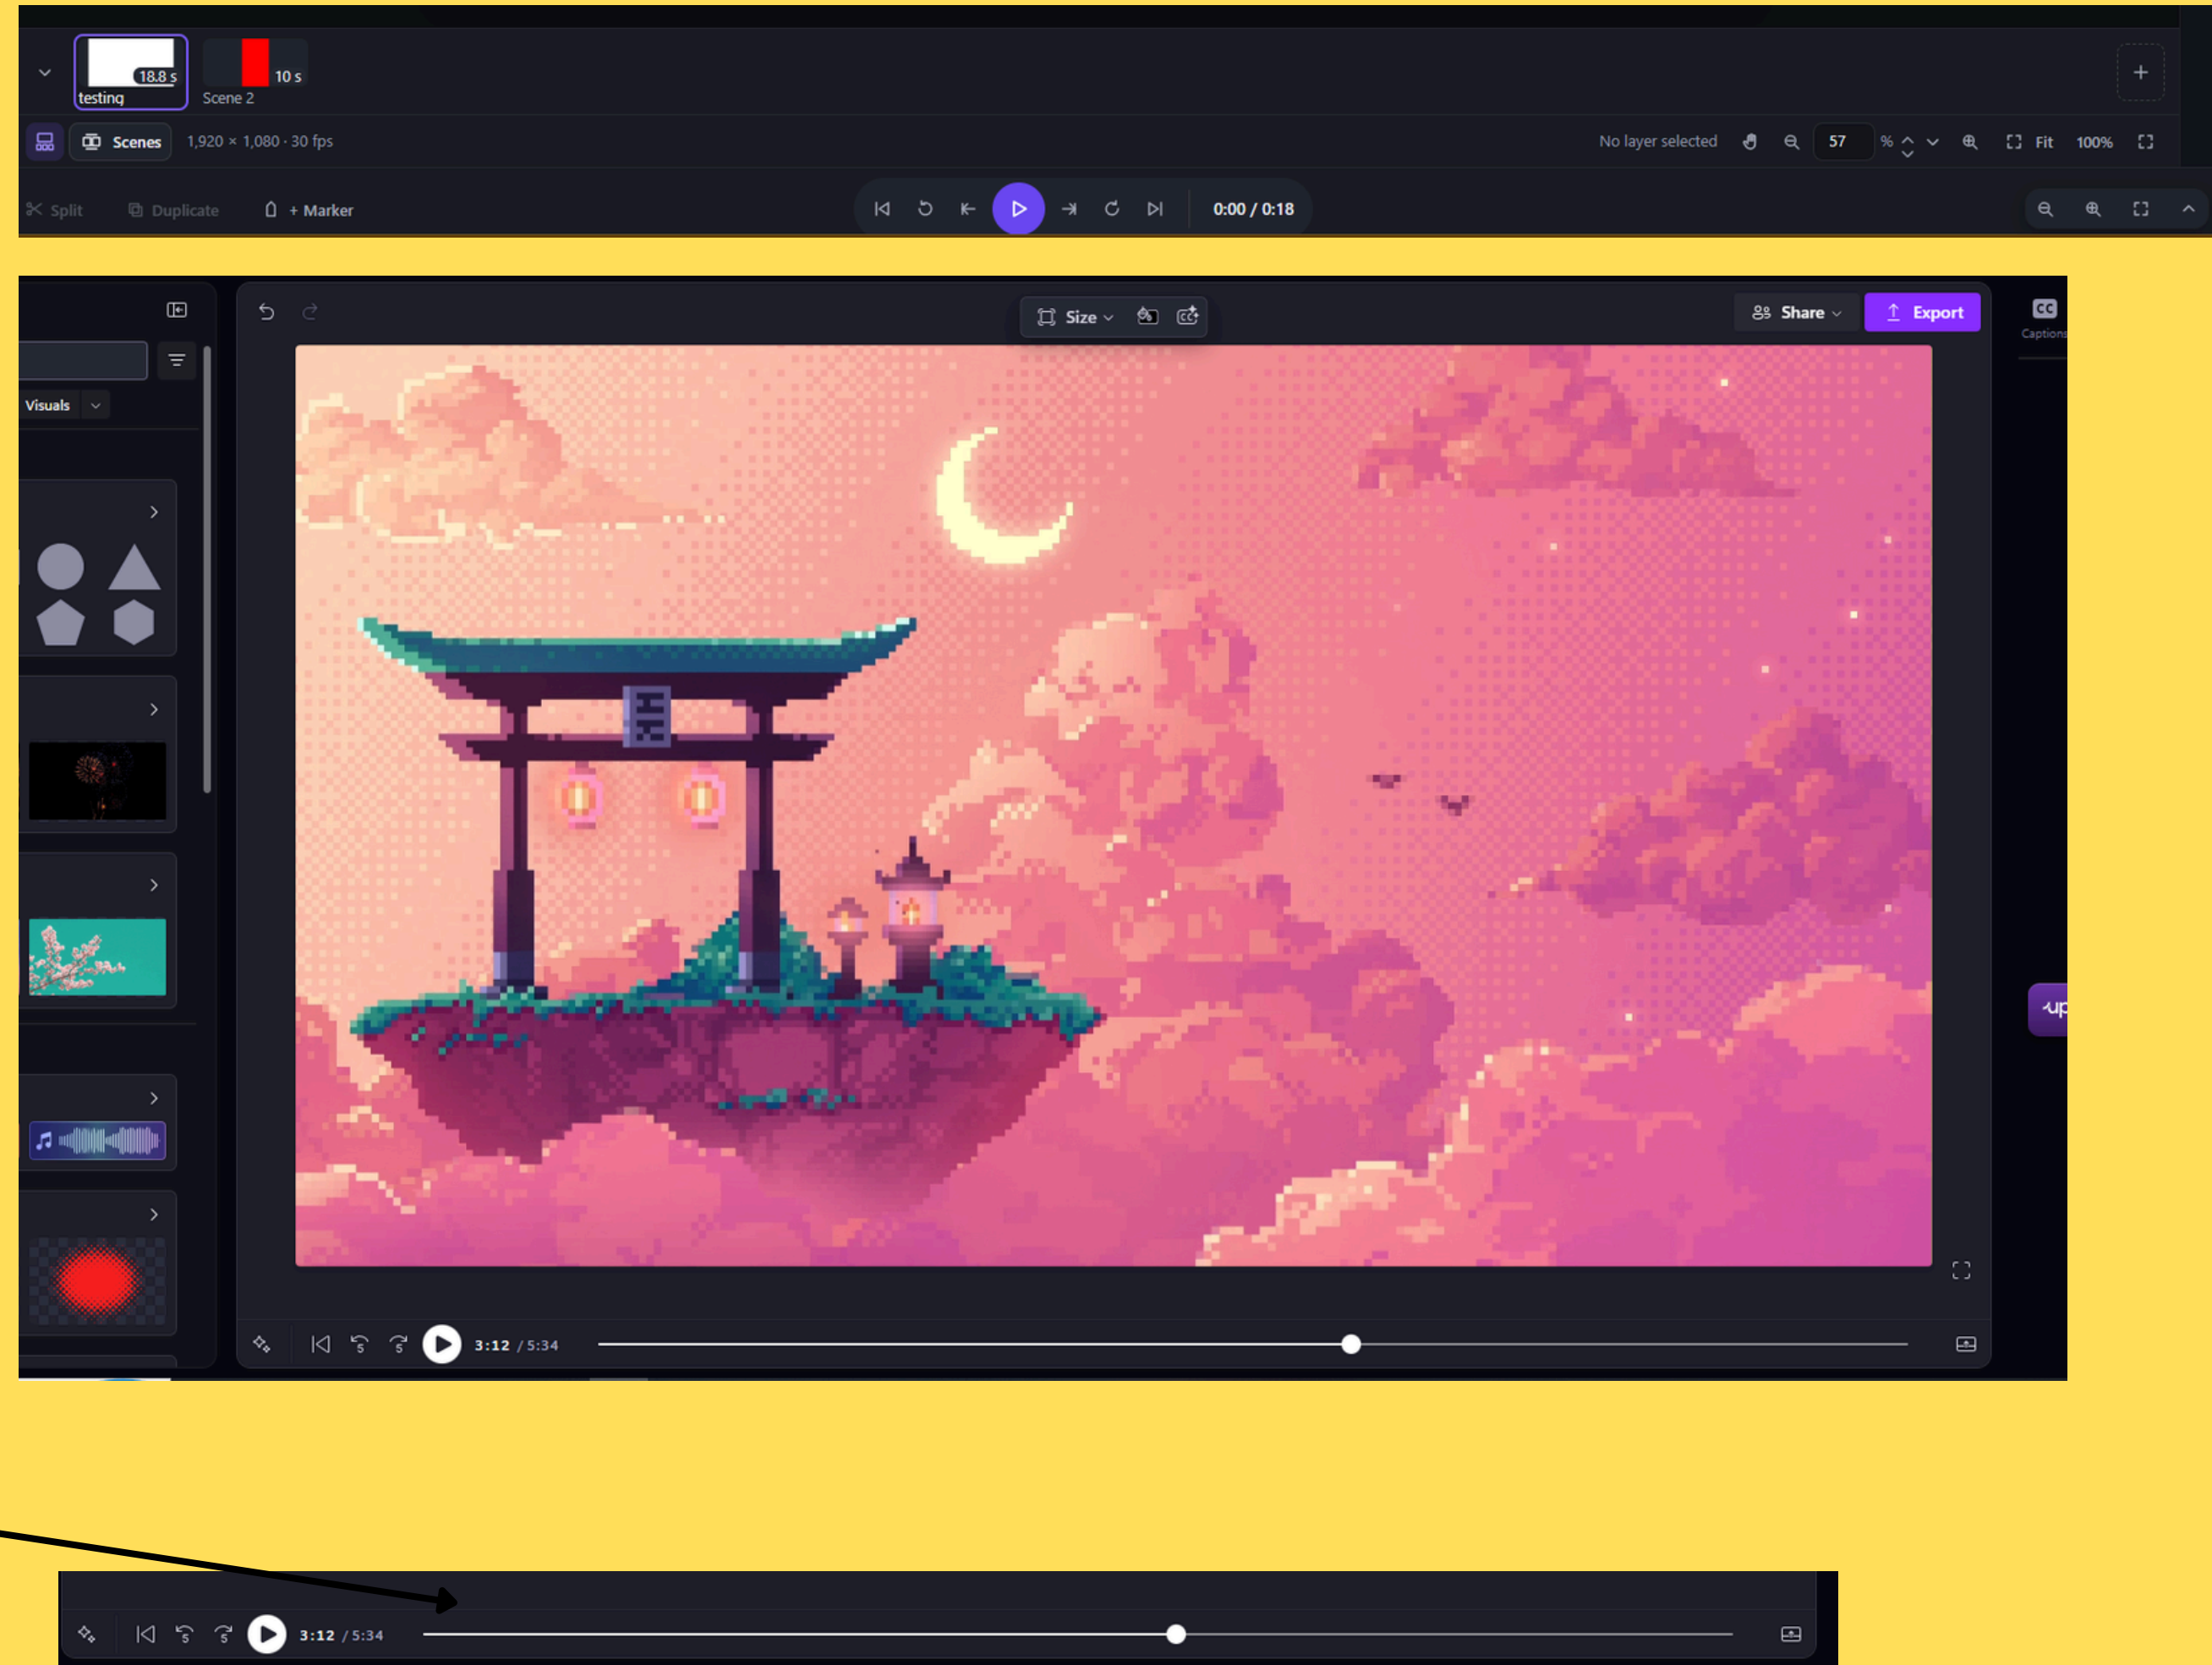

Final frame of
playback/rendering
range

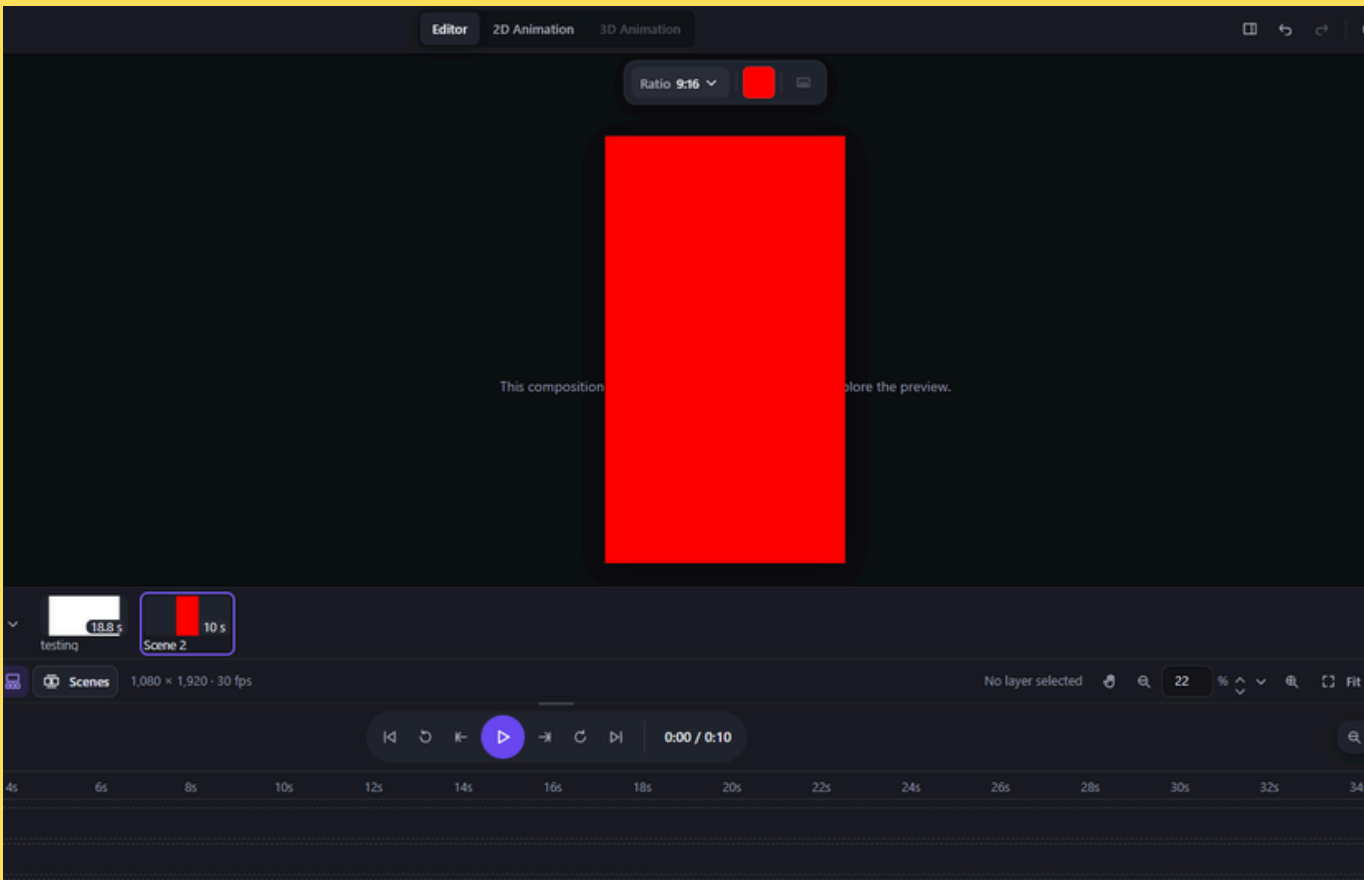

- Same wesa hi feature hamein add karna hein hamare tool mein eo bhi jaha timeline hein waha last mein neeche right side corner mein jo mene Blue color se dikhaya hein, ek esa same panel banao blender mein jesa hein wesa. wo bhi sticky panel waha par fixed.

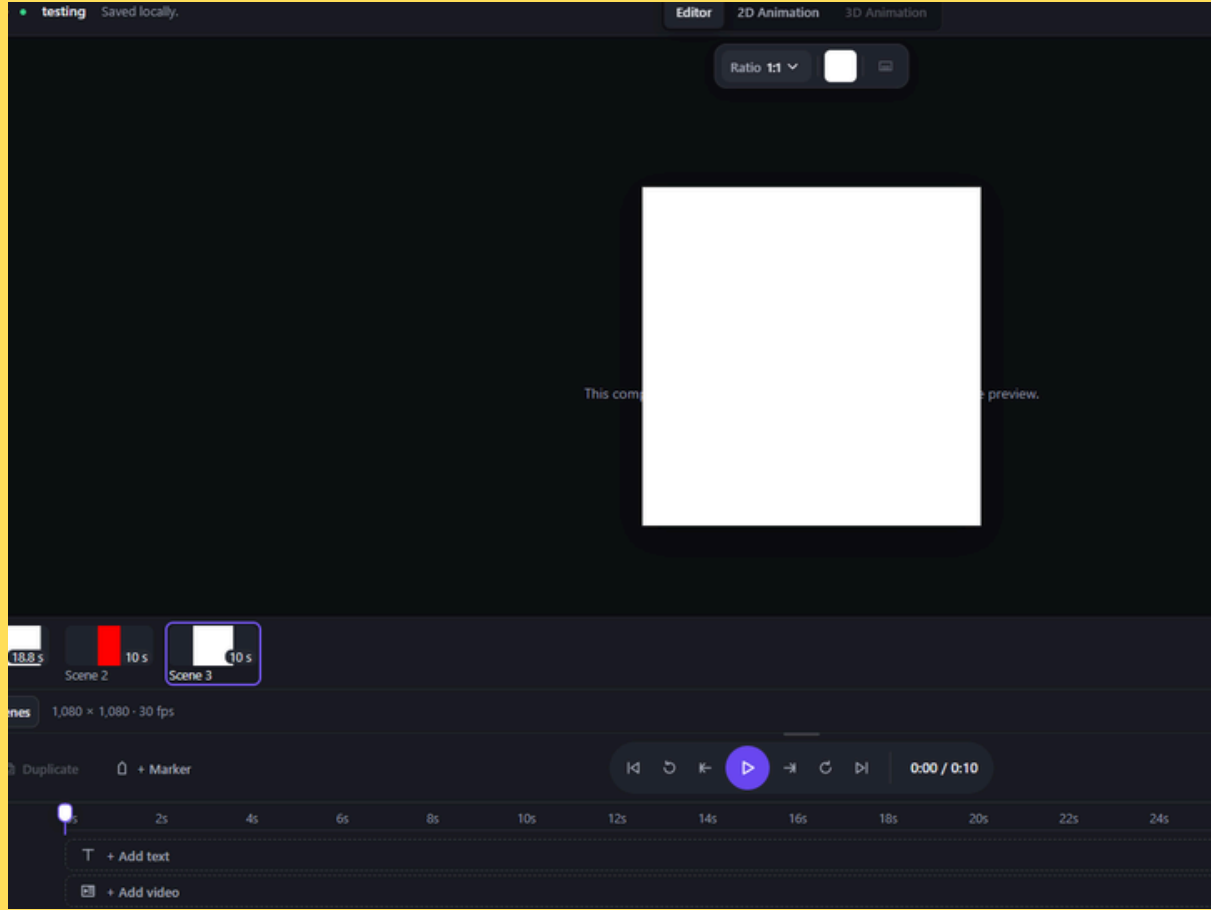

- Fir bhai ye dekho ye tumne jo collapse button pe click karne se expand hona screen ka wo tumne kuch esa banaya hein. Jo Clipchamp jesa bilkul bhi nahi hein. Clipchamp ka UI dekho sirf Playback panel aur canvas aur kuch bhi nahi dikhna chahiye. But hamare mein dekho playback panel ke uper ka scenes ka pura panel bhi sath mein dikh raha hein jo nahi hona chahiye. Aur sath mein jab ham collapse/expand button par click karte hein tab wo transition ke sath nahi ho rahe hein. sidha hi direct collaps aur expand directly. koi transition se open or close nahi ho raha hein.
- Fir Clipchanmp mein dekho ye expand hone par Playback panel jese ek player ki tarah ka UI jese video chal rahi ho slider wali line. wo nahi banaya hein hamare tool mein. So ye clipchamp ka pura UI slider wala playback ke sath banao.

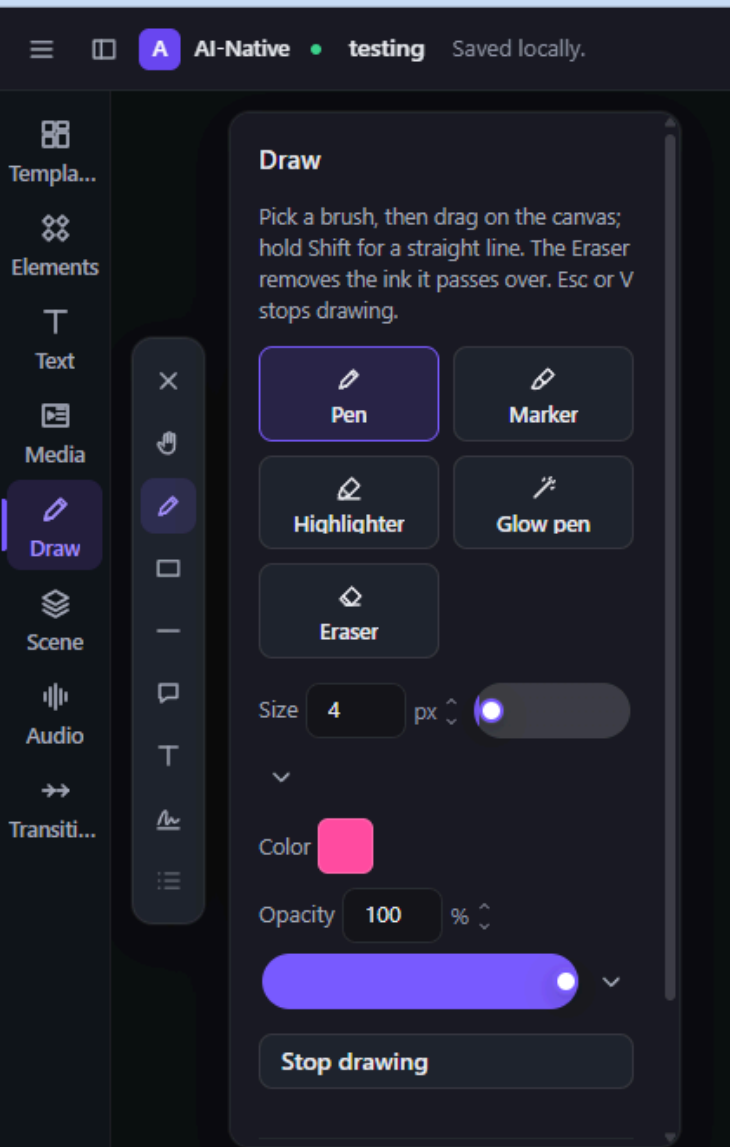

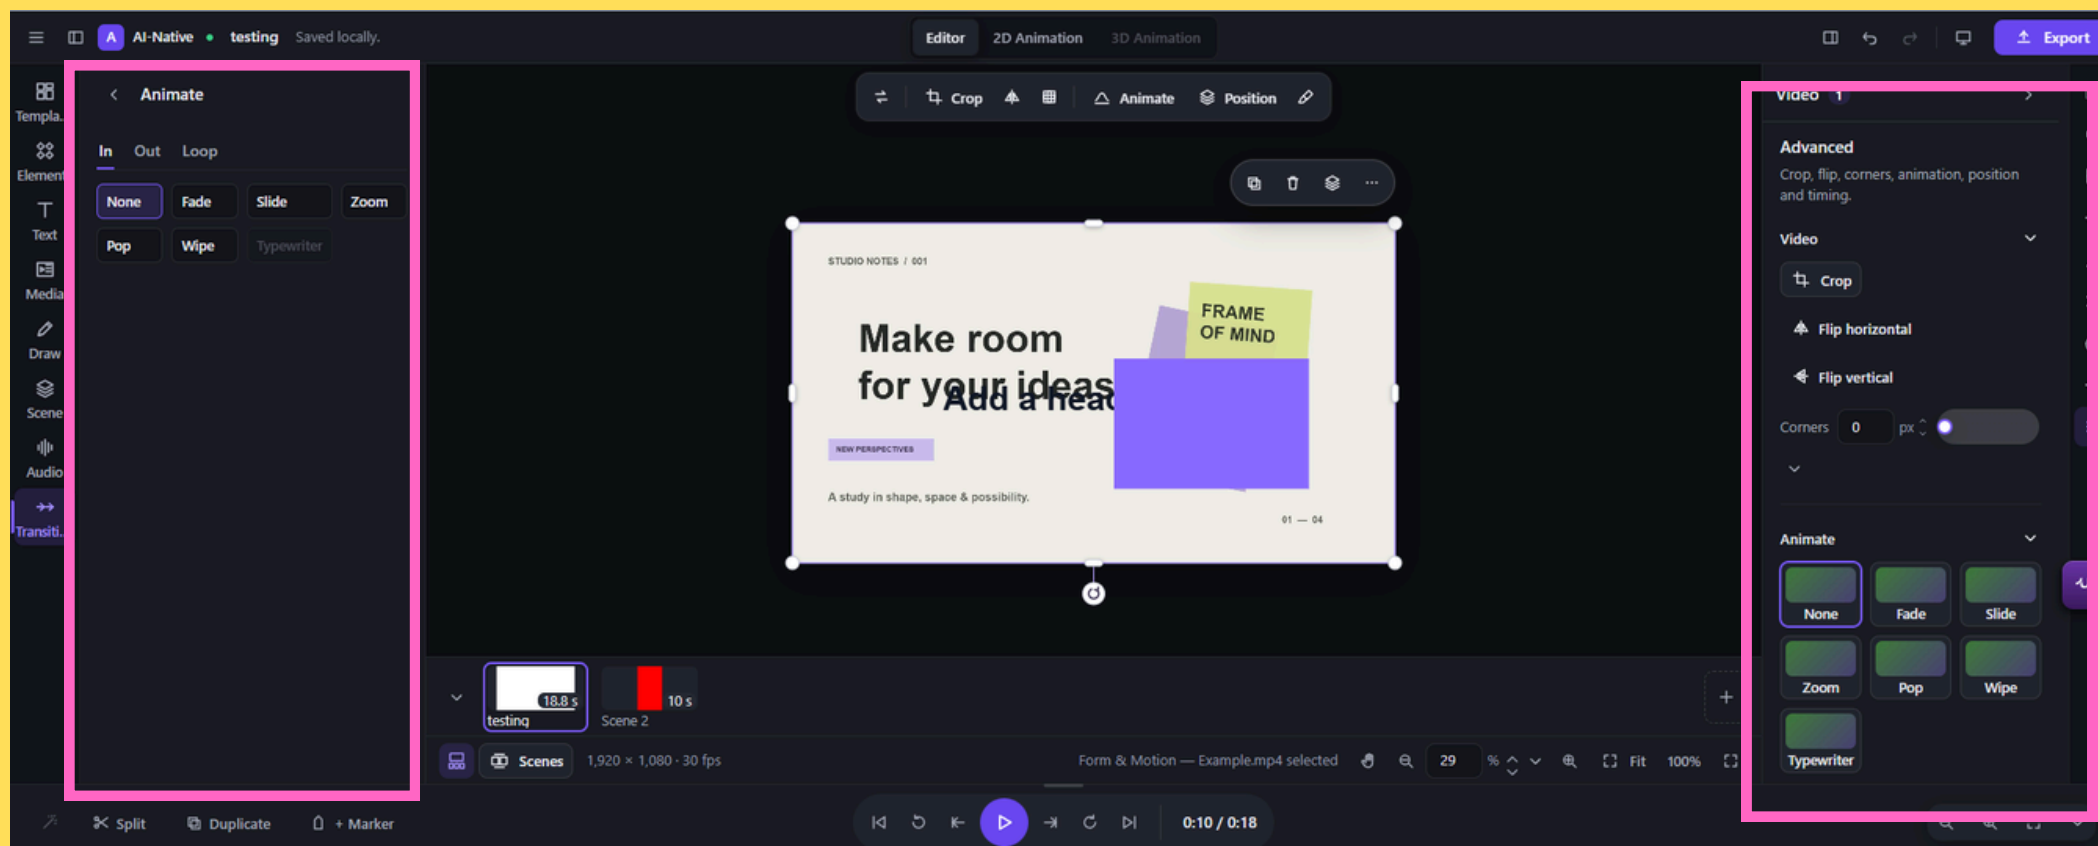

- Fir bhai ye dekho alag alag ratio change karne par ye canvas mein kuch peeche text likha hua aa raha hein. Wo nikalo usse. har ratio change karne par ye texts peeche hote hi hein. Aur ek baat bhai ratio dekho change hone par canvas bohot hi chota dikh raha hein usse bhi solve karo.

- Fir bai ye Draw ka panel bhi dekho uska bhi scroll mouse se nahi chal raha hein solve karo.

- Fir bhai ek Bug aur mila tumne dekho jab ham kisi bhi object ko click karte hein tab uska floating menu open hota hein aur uske sath right side panle bhi object ke according. So mene dekha ki right side panel mein kisi bhi object ke properties mein sidebar menu mein dekho Animate ka feature diya hua hein. Aur same time agar uske floating menu mein ham animate button par click karte hein tab left side bar khulta hein aur waha bhi same uske features open ho rahe hein. So esa nahi hona chahiye dono taraf animate ka option nahi khulna chahiye.
- So abb tumhe kya karna chahiye ki ek to right side ke sidebar mein properties menu mein se pehle to Animate ka feature nikal do aur right side panel mein ek new category “Animate” add karo. So usmein tumhe left side bar mein jo (In, Out, Both) ye teeno Tab jo banaye hein wo same rakhna hein, bus jo ye left side mein (Fade, slide, zoom) etc.. jo banaya hein wo ekdam simple likha hua text box jesa banaya hein wo nahi chahiye. Uske bajay clipchamp jesa jo mene dusre image mein dikhaya hein wesa same banana hein. Means jo sipmple text box jese uska layout UI banaya hein wesa nahi chahiye UI. Same jo clipchamp mein hein hein wesa hi image mein dekho wesa UI chahiye. But dekho clipchamp mein bhi (In, Out, Both) ka Tab nahi hein jesa hamne banaya hein so hamein to Tab rakhna hein usse nikal na nahi hein. Sirf (Fade, slide, zoom) etc.. ka UI jo hein wo clipchamp jesa. Aur han bhai ye left side ka Animate wala sidebar nikal do. Uske bajay jab floating menu mein Animate option ko click karne par jo hamne kaha ki right side menu mein Animate ki new category wala sidebar wahi khulna chahiye.
