

- Agar Canvas mein video clip select ho to Right side panel mein ye 7 Options dikhne chahiye, (Auto captions, Audio, Fade, Filters, Effects, Adjust colors, Speed).
Aur same timeline mein video clip ko right click kare to ye 10 Options dikhne chahiye aur ismein agar koi last mein More options dikh raha hein usmein click kare to sidha right side panel hi dihna chahiye.

Timeline clip right click menu

- Agar Canvas empty ho to timeline mein kuch esa dikhna chahiye. Pura khali dikhane se achha hein ki usko instruction de ki jese “Add Video”. So user ko pata chalega ki yaha pe kuch add karna hein.

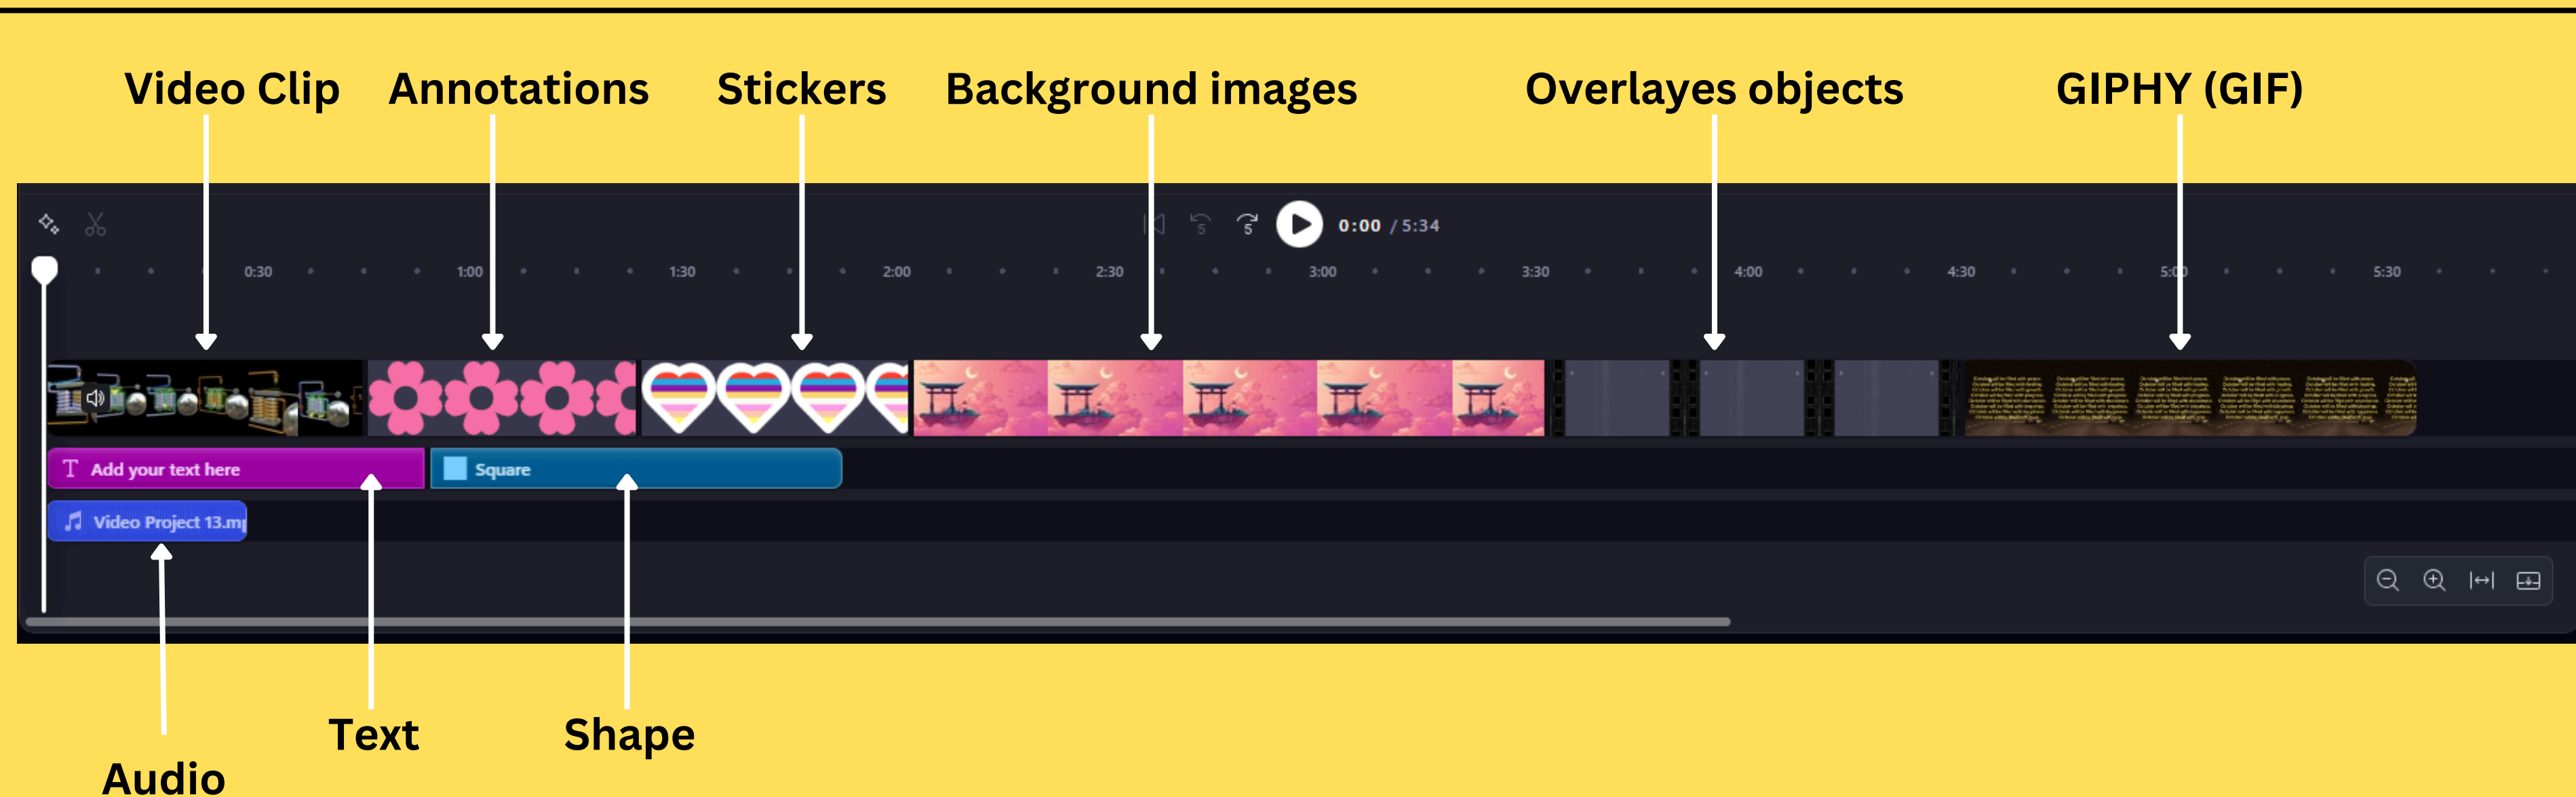

- Fir jab user koi Video clip ko left side panel se drag kare to fir usmein 2 condition hogi, (1) Agar user drag sidha canvas par karega to canvas mein jab video drag ho raha hoga tab kuch canvas esa dikhna chahiye jese ki wo select ho wesa like jese wo guide kar raha hein ki wahi pe drop karo. ye effect tabhi dikhni chahiye jab clip canvas ke uper drag baaki uske baha nahi dikhna chahiye. (2) Agar user sidha timeline par drag kare to timeline kuch esa hi sikhna chahiye jesa ki wo select ho. same jesa canvas mein wesa hi same timeline mein.

- Aur fir jab Clip drop ho jaye to timeline mein kuch esa dikhna chahiye., Clip ka preview dikhna chahiye, fir jo bhi assets baaki ho uska bhi ismein preview dikhaya hein jese ki like wo hamein info de rahe ho ki yaha pe text ko rakho ya yaha pe audio ko rakho.

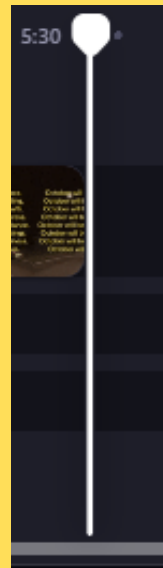

- Abb Dekho bhai ye Pura Timeline ka Overview hein. Iss mein Sirf 3 hi NLE saperate kiye hue hein. Abb dekho ismein (1) Video clip, Annotations, Stickers, Background images, Overlayes objects, GIPHY (GIF). Ye sabhi ek hi layer mein sath mein add ho sakte hein aur ye alag alag layers mein bhi add ho sakte hein. (2) text, Shape. Ye dono bhi ek sath ek hi layer mein add ho sakte hein and alag alag layer mein add ho sakte hein. (3) Audio. Ye sirf ek hi layer mein add ho sakta hein.
- Abb khas baat ye hein ki ye jo 3 NLE hein wo kabhi bhi ek dusre ke layer mein kabhi add nahi ho sakte. Means jitne bhi assets hein wo sabhi ismein hein aur jo bhi ekdusre ke sath mein add ho sakte hein wo dikhaye hein. Means example ke taur mein 1st layer mein jitne bhi assets dikhaye hein wo kabhi bhi 2nd layer wale assets ke sath aur 3rd layer ke asset ke sath add (merge) nahi ho sakte.
- So isse hamein ye pata chala ki Text aur sahpe ki ek alag layer banegi aur audio ki bhi ek alag layer banegi aur baaki sare bhi objects hein uski ek layer banegi.
- Lekin dhyan rahe ye image hamein ye dikhati hein ki agar ye sare objects canvas mein ek sath ho to timeline mein minimum to minimum 3 layers ban sakte hein, maximum to kitne bhi layers ban sakte hein but kabhi bhi 3 layers se kam nahi ban sakte jab ye sabhi assets timeline mein ho tab.

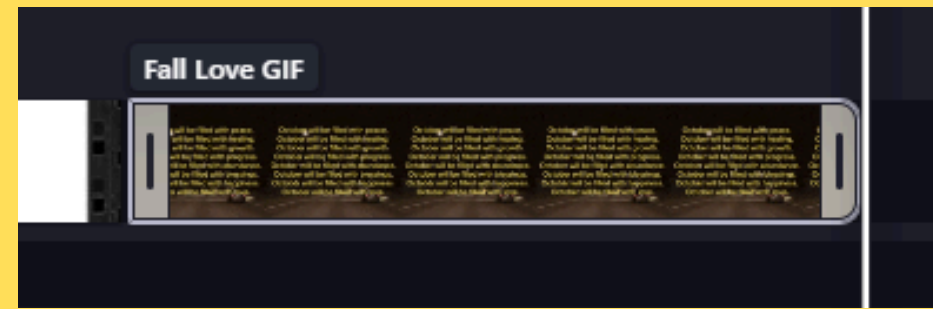

Timeline Design

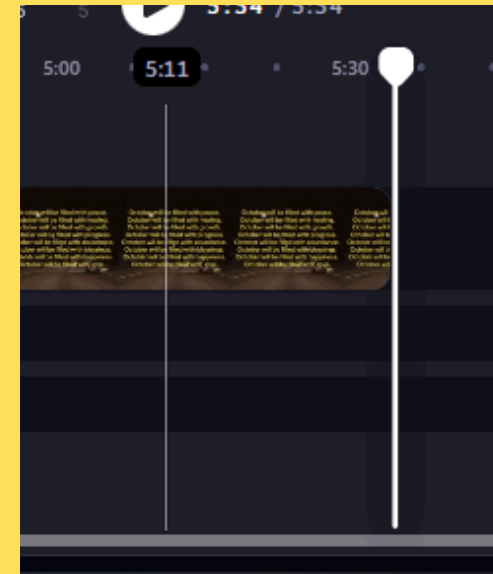

(1) Timeline Slider

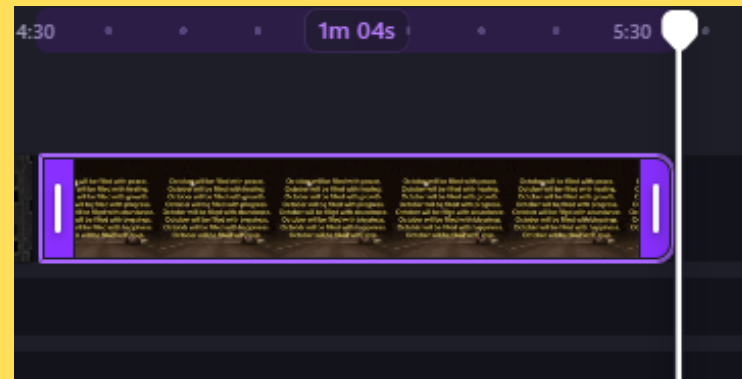

(2) Any objects mouse hover

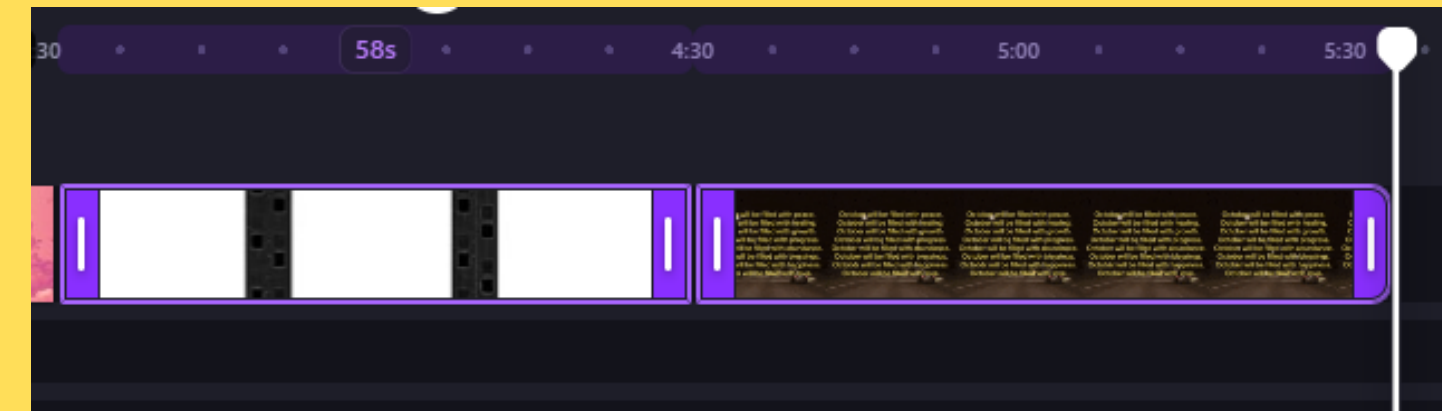

(3) Ghost preview of timeline slider

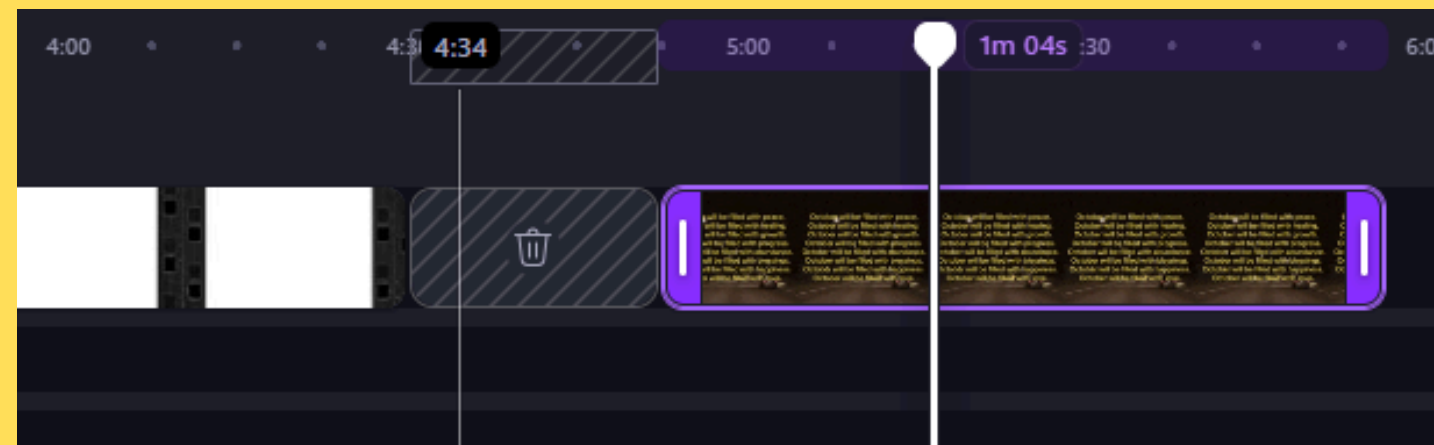

(4) Select any object on timeline

(5) Multi select any objects on timeline with mouse drag on timeline with ghost preview

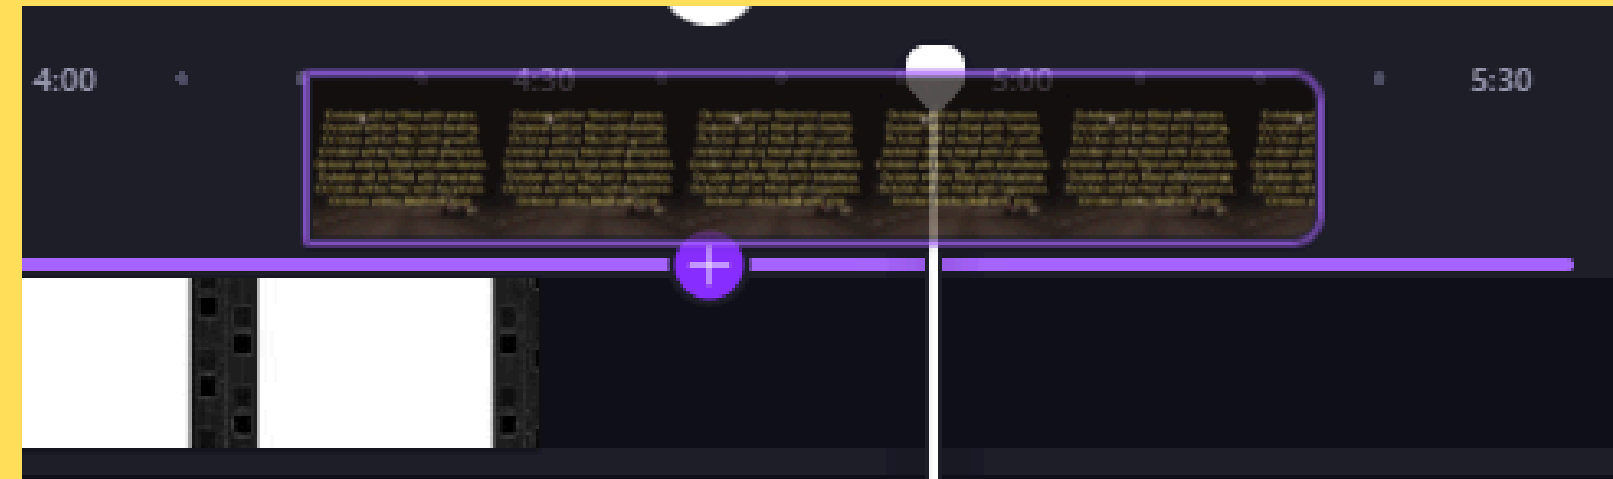

(6) Distance between tow objects on timeline the empty space shows the delete option previwe

Timeline Design
