

- deho bhai pehle to ye new scenes jo add hone ka new layout banaya hein (Blue color highlight area) usse pehle to tum hide karo, delete nahi. Fir ye jo Scene wala button hein (Pink color highlight area) uske baju mein left side ek button add karo jisse click kare to hi ye uper wala scenes ka layout show hona chahiye kyunki isse canvas chota ho gaya hein. So jab user button par click kare tabhi wo layout khulna chahiye wo bhi animation ke sath. baaki wo hide hi rehna chahiye taki Canvas jab wo hide ho tab wo pura bada dikhna chahiye.
- Fir ye jo neeche ka layout (Pink color highlight area) scene ka aur uske right side mein zoomin, zoomout, pan, fit, fullscreen ka ye sab ka UI change karo. uska UI zarabhi accha nahi hein Means uska layout poora hi panel ka accha nahi dikh raha hein. Ek to jo icons aur texts hein wo bohot hi chote dikh rahe hein. So kuch new banao.

- Fir dekho bhai ye jo Timeline likha hua pura panel dikh raha hein na (Blue color highlight area) wo to tum usko delete hi kardo. Uska koi kaam hi nahi hein aur uski wajah se Canvas jo hein wo bohot hi chota dikh raha hein aur Timeline ki nich ki layers bhi dikh nahi rahe hein. So isse to tum delete hi kardo so jaha se ye palyer ka jo panel hein wo hi usko uper ki taraf drag kar ke timeline ko move kar sake.
- Fir dekho Player la panel wo to bhai tumne zarabhi accha nahi banaya hein uska UI change karo same like clipchamp. usmein first split, duplecate, marker wo sab ka icons aur text bohot hi chote dikh rahe hein. Fir Player to dekho uske icons to dekho bohot hi kharab aur bohot hi chote dikh rahe hein. Aur usmein tumne previous cut, back 5 secs, previous frame, play/pause, next frame, farword 5 secs, stop. ye banaya hein tumne. But tumhe iske bajay abb First frame, back 5 secs, previous frame, play/pause, next frame, farword 5 secs, Last frame. ye banana hein. Aur iske icons change karo, aur icons ki size increse karo. Aur bhai iske baad to dekho digits kya yar bohot hi kharab dikh raha hein. tumhe same clipchamp jesa hi waha digits dikhana hein. Aur bhai uske baad last mein right side mein pehle kuch texts hein “main composition 10s 30fps” wo to nikal hi do. Aur fir jo zoomin, zoomout, fit,collapes ka icons aur text ki size choti hein uski bhi size increse karo.
